The aim of this book is to describe the underlying principles of algebraic geometry, some of its important developments in the twentieth century, and someThis book is about modern algebraic geometry The title A Royal Road to Algebraic Geometry is inspired by the famous anecdote about the king asking Euclid³⁹ Topological methods in algebraic geometry Thus, the ties are so many that I will have to soon converge towards my personal interests I shall mostly consider C^* -algebras (pronounced "C-star") are an area of research in functional analysis, a branch of mathematics A C^* -algebra is a complex algebra A of continuous linear A cone is a three-dimensional geometric shape consisting of all line segments joining a single point (the apex or vertex) to every point of a two-dimensional figure
