Spatially resolved imaging of inhomogeneous charge ... Apr 12, 2005
Langmuir 2005 Apr 12;21(8):3521-8 Spatially resolved imaging of inhomogeneous charge transfer behavior in polymorphous molybdenum oxideThe reaction of CO₂ on the vicinal Cu(997) surface at 340 K under CO₂ gas pressure of 0.8 mbar was investigated by ambient pressure X-ray photoelectron spectroscopyNon-destructive depth profile reconstruction of bio-engineered surfaces by parallel-angle-resolved X-ray photoelectron spectroscopyAtomic emission spectroscopy (AES) is a method of chemical analysis that uses the intensity of light emitted from a flame, plasma, arc, or spark at a particular The emission spectrum of a chemical element or chemical compound is the spectrum of frequencies of electromagnetic radiation emitted due to an atom or molecule making
