Probability Theory: Description: Introduction to Probability: To introduce probability theory through simple experimentsSummary: The probability of an event is the measure of the chance that the event will occur as a result of an experiment The probability of an event A is the number = $70 / 200 = 0.35$ Exercises: a) A die is rolled, find the probability that the number obtained is greater than 4 b) Two coins are tossed, find the probability that Probability in mathematics is the calculation of uncertainty Probabilities are not at a single point It is a number expressing the chances for a specific event will What is Probability? Probability is the study of chance or the likelihood of an event happening Directly or indirectly, probability plays a role in all
